

You're Invited!

Dear Parents,

During November and December, 2-Purple did a unit of study on the rainforest. We read about the rainforest, and learned about the plants, animals, people, weather, and location of the rainforest. We also discussed the importance of saving the rainforest.

All of the students in our class chose one rainforest animal that they found especially interesting to research and write a report about. They used many different books and internet sources to complete their research, and put the information that they learned into a book about their rainforest animal. Then they made models of their animals and painted them. They worked very hard on this, and are now ready to present their reports and the animals that they made. Therefore, we will be having a celebration of our rainforest projects on Thursday, January 12th at 9:45. All of the students in 2-Purple will have the chance to share with you their finished reports and to show you the models of their animals that they made. **Please join us next Thursday, January 12th at 9:45 in our classroom for our rainforest project celebration!**

Sincerely,

Ms. Robinson & 2-Purple
