Ellis Island Diary

Dear Diary,

Today at Ellis Island it was scary because alot of people that we don't know was there. Me and my family went to the medical examination table to see if I can see well and if we were healthy. We went to the examination to fix my leg the examination doctor told me I was about to go to America. I was thinking it would be hard and scary to be seen by a doctor w did not know. They asked me to march cards. When I got to the examination room we had an eye exam. I did not like it. I was tired my feet hurt. I was hungry. After me and my family were found to be healthy we were given our papers to go to New York City. We took a boat to Ellis Island. It was crowded with alot of people like me and my family. On the boat I got sea sick my father had to comfort me and my sisters.
