Science Project Observation Sheet

This is what I was observing: Music

This is what I noticed about it: I noticed the stem in one and it is bended.

This is what I think is important about my observations: I think music really helps plants grow

This is what I think I might see the next time I observe: I think I might see a flower

Science Project Observation Sheet

This is what I was observing: no music

This is what I noticed about it: I noticed one plant
is really growing and it's getting
big. but we put more soil in
it.

This is what I think is important about my observations: that you
shouldn't water it so much.

This is what I think I might see the next time I observe: maybe I
